# FLEETTRACKER

gps vehicle tracking

“LIVE” TRACKING FOR COMPANIES WHO JUST SIMPLY WANT TO KNOW WHERE THEIR VEHICLES, ASSETS, AND EMPLOYEES ARE AT ANY ONE TIME.

## How **FleetTracker** can help your business...

- » Reduces fuel & running costs
- » Differentiates between business & private mileage
- » Improves productivity
- » Enhances customer service
- » Accurately assesses overtime claims
- » Addresses employment legislation

## How **FleetTracker** works...

**FleetTracker** is a comprehensive and cost-effective GPS vehicle tracking solution suitable for any size of fleet in any type of industry, giving you real-time visibility of your remote workforces.

Accessed via a secure web-based platform, **FleetTracker** displays “live” vehicle locations with continual traffic updates on Crystal Ball’s detailed mapping solution - which incorporates satellite, street level and hybrid views.

It also offers a comprehensive reporting suite with business intelligence to help you reduce costs, improve productivity and enhance customer service - all of which are essential to ensure business profitability.

**FleetTracker's** real-time mapping clearly displays vehicle locations and status including:

- » vehicle speeds
- » vehicle heading
- » engine on/off/idle status
- » geofence boundaries

# FleetTracker includes...

## » dashboard

"at a glance" dashboard can be configured by the administrator to show preferred real-time data analysis, with the flexibility to compare data over days, weeks, months, or specified time periods.

## » alarms and alerts

sent via email to notify management and supervisors when vehicles are:

- speeding
- entering / exiting geofences
- exceeded allowances - idling time

## » geofences

geofences are virtual geographic boundaries created around specified locations.

## » nearest to postcode

allows the administrator to determine which vehicle is closest to a particular postcode, ideal for customer service and logistics departments.

## » timesheets

one of the key reporting tools for fleet and finance management, delivering accurate data that can be used for overtime and cost allocations.

## » `snail trail' route data

replay a specific vehicle journey showing the recorded way points on the system, with colour coded icons displaying speeding and idle events.

## » scheduled email reports

sends selected reports automatically to specific recipients at predetermined times.

## » customer promise

Crystal Ball's service level agreement delivers peace of mind to our customers, assuring them of maximum uptime and unparalleled support.

dashboard can be configured to show your preferred real-time data analysis, including:

- » fuel used
- » idling analysis
- » business v out of working hours mileage
- » vehicle status

In addition, **FleetTracker's** functionality can be enhanced with a range of bolt-ons to meet your specific business requirements.

### Driver Behaviour & Safety

offers detailed driver behaviour analysis and performance league tables with **FleetTracker**.

### Driver Behaviour Aid

offers driver behaviour reporting with additional in-car driver behaviour aids (DBAs).

### Driver Identification

coded "dallas key" fobs allow drivers to use multiple vehicles in the fleet, with all tracking and reporting data allocated against the driver.

### Immobilisation

adds additional levels of security to company vehicles.

### Accessory PTO

offers utilisation reports against the use of any mechanical attachments to a vehicle, such as hydraulic pumps or lifting equipment.

Vehicle & Asset  
Tracking

Mobile  
Tracking

Lone Worker  
Protection

Remote Workforce  
Apps
